

CIVIL AVIATION EXHIBITION

24-26 JULY 2009

DON MUEANG INTERNATIONAL AIRPORT

## **Background and Justification**

Air transportation is considered a basic service which plays a significant role in developing economy and export of the country. This is because air transportation is more convenient, faster, and safer than other modes of transport especially, nowadays, when there is an increase in communication among countries. This makes air transportation more important. Furthermore, the national policy on this matter is to enable Thailand to become an aviation hub of the Southeast Asia. Therefore, it is justified to lay on aviation activities such as air show, static display, exhibition show and seminar so as to give opportunities to any persons who love and are interested in aviation as well as to the public to learn and keep close to aviation. Moreover, private sectors which operate activities relevant to air transport have been invited to participate in the Exhibition. This may alert people to take an interest in aviation as well as boost the development of aviation in all aspects.

The Exhibition, therefore, is, now, being held during the period of 24-26 July 2009.

## **Objectives**

1. To promote and support Thailand's aviation industries
2. To promote and support the making up of aviation personnel
3. To promote flying sports to the people and youths

## **Activities**

1. Static Display
2. Exhibition on:
  - Education
  - Aircraft Parts
  - Domestic and Foreign Repair Stations
  - Domestic Airlines
3. Air Show

4. Seminar on:

- Thailand's Open Sky Policy
